A stroke screening is coming to your neighborhood:

Where: Philadelphia - Camphor Memorial United Methodist Church
When: Monday, January 10, 2011
Pre-registration is required. Call 1-800-690-6313

We Can Help You Avoid a Stroke

Trusted by Hospitals Nationwide

Life Line Screening has screened over 6 million participants and has partnered with hospitals across the country. Why? Because the ultrasound screenings that we offer can help save your life.

1 Stroke/Carotid Artery Screening

Ultrasound evaluation of the carotid arteries that screens for buildup of fatty plaque – the leading cause of strokes.

2 Heart Rhythm Screening (Atrial Fibrillation)

A quick and easy test using EKG electrodes placed on the arms and legs to identify the presence or absence of an irregular heartbeat at the time of the screening.

3 Abdominal Aortic Aneurysm Screening

Ultrasound is used to screen for the presence of an aneurysm in the abdominal aorta that could lead to a ruptured aortic artery.

4 Peripheral Arterial Disease Screening

Evaluates for peripheral arterial disease (plaque buildup) in the lower extremities. It is 4-5 times more likely you will die from heart disease if you have peripheral arterial disease.

5 Osteoporosis Risk Assessment

An ultrasound measurement of the heel bone to determine abnormal bone mass density. Osteoporosis is painless and silent in its early stages.

**Stroke, Vascular Disease & Heart Rhythm Package;
all 4 tests for only \$139**

**Add an osteoporosis screening for \$10 more;
all 5 tests for \$149 (\$126 savings!)**

Life Line Screening uses only advanced colorflow ultrasound technology and experienced highly skilled technologists. Screening results are provided to you within 21 days after physician review.

Life Line Screening is dedicated to providing the highest quality imaging technology at an affordable rate. Our mission is to make people aware of an undetected health problem and encourage them to seek follow-up care with their physician. Life Line Screening offers a convenient, affordable, confidential and accurate way for men and women to monitor their health. If a significant finding is noted through the screening process, you will take the report to your physician who can then order further testing and give consideration for treatment.

Appropriate modification of stroke risk factors (including high blood pressure, smoking, heart disease, diabetes and poor diet) is also necessary for stroke prevention. Our screenings cannot detect all forms of stroke. All tests are for screening purposes only. You should consult with your personal physician regarding your screening results.

Insurance Note: Life Line Screening does not participate in the Medicare program and the cost of our screening services is not covered or reimbursable by Medicare. Life Line Screening does not file insurance claims and the cost of our screening services is your responsibility.

Screenings in Kansas are performed by Life Line Screening of America, LLC on behalf of Life Line Screening Physicians, P.A.

Screenings in California are provided by Life Line Mobile Screening.

In some states, including Texas, physician authorization is required. A Life Line Screening affiliated physician will provide authorization for you if you qualify. If a potentially life-threatening condition is discovered you will promptly receive results after physician review.
